

Course Name: Extended Firewall Management (205)

Course Code: PAN-EDU-205

Duration: Two Days

Introduction

Extended Firewall Management is the next-level follow-on course to Palo Alto Networks Installation, Configuration, and Management (PAN-EDU-201). Extended Firewall Management expands on 201 course topics, while introducing many new features and functions of Palo Alto Networks Next-Generation firewalls.

Objectives

Successful completion of this two-day, instructor-led course will enhance the student's understanding of how to install, configure, manage, and perform basic troubleshooting on the entire line of Palo Alto Networks Next-Generation firewalls.

Additionally, students will be instructed on the basics of implementing and managing GlobalProtect and Active/Active High Availability. Students will gain an in-depth knowledge of how to optimize their visibility and control over applications, users, and content.

Prerequisites

Who should attend this class

Completion of Firewall Installation, Configuration, and Management (201) or equivalent experience is highly recommended. Students must have a basic familiarity with networking concepts including routing, switching, IP addressing, and basic port-based security concepts.

Course Outline

Day 1	
Module 0:	Overview
Module 1:	Platforms & Architecture
Module 2:	Administration & Management
Module 3:	Interface Configuration
Module 4:	Layer 3
Module 5:	App-ID™

Day 2	
Module 6:	Content-ID™
Module 7:	User-ID™
Module 8:	GlobalProtect™
Module 9:	Mobile Security Manager
Module 10:	High Availability

Training Location

Mideast Communication Systems

Palo Alto Authorized Training Center
